WC SERIES Cutting Pump Non-clogging Sewage Submersible Pump

PRODUCT FEATURES

Epoxy Cable Base

An epoxy resin seal cable base prevents moisture from entering the motor through the core wires.

Nice precision cast iron

from 3Kw use 3pcs heavy duty bearing

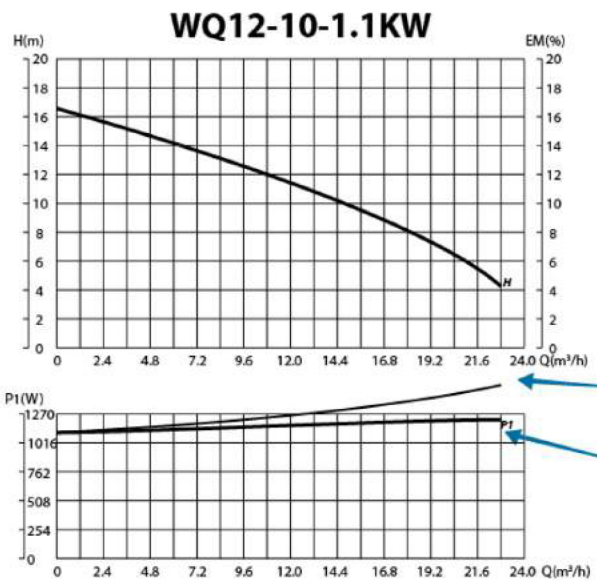
Auto-cut motor protector

Auto-cut thermal protector the Auto-cut protector will be activated and cut the power off automaticlly if motor run in abnormal electric and excess .

Mechanical Seal

A double mechanical seal consists of two seals arranged in a series. Superior abrasion resistant mechanical seal manufactured with silicon carbide to ensure the best seal effect.

WC SERIES CUTTING PUMP CURVE



Vortex impeller

Strong cutter

Cutter Impeller With Cutter Ring

1.the impeller with non clogging design with design right
2.material for the impeller and cutter ring:high-chromium stainless steel 420 and the hardness is HRC49-52 provide good wearing resistance.

Normal sewage pump the power need very big when use the big flow point.and motor will be heating and burn broken

OLBIN WC pump can use every point flowrate.and power is almost one level.motor temperature is almost same level.

WC SERIES Cutting Pump **Non-clogging Sewage Submersible Pump**

After pump cutting drainage out

SPECIFICATIONS

Item		Description
Limits of Use	Liquid Temp.	0~40°C (32~104°F)
	Applications	residential wastewater.sewage
Type	Frequency	50Hz
	Motor	2P(2900Rpm) • Dry motor
	Insulation	Class B (ClassF is option)
	Protection	IP68
	Protector	Auto-cut thermal protector for single phase (three phase without)
	Bearing	Ball type
	mechanical seal	Double M.seals
	Impeller	Vortex

WC SERIES Cutting Pump **Non-clogging Sewage Submersible Pump**

PRODUCT FEATURES

Vortex impeller Strong cutter

Cutter Impeller With Cutter Ring

1.the impeller with non clogging design.
2.material for the impeller and cutter ring:high-chromium stainless steel 420 and the hardness is HRC49-52 provide good wearing resistance.

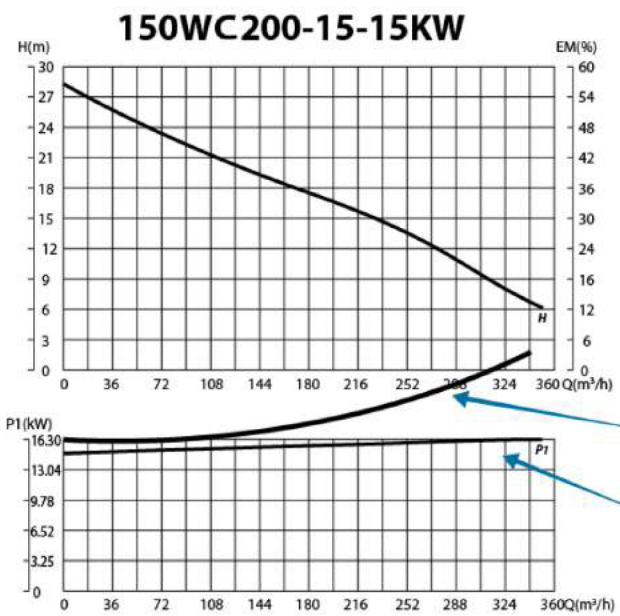
Heavy duty bearing

Heavy duty bearing and ss420 shaft

Mechanical Seal

A double mechanical seal consists of two seals arranged in a series. Superior abrasion resistant mechanical seal manufactured with silicon carbide to ensure the best seal effect.

WC SERIES CUTTING PUMP CURVE



NORMAL SEWAGE PUMP will clog by the rubish inside wastewater
WC Non clogging pump good solve these problem..

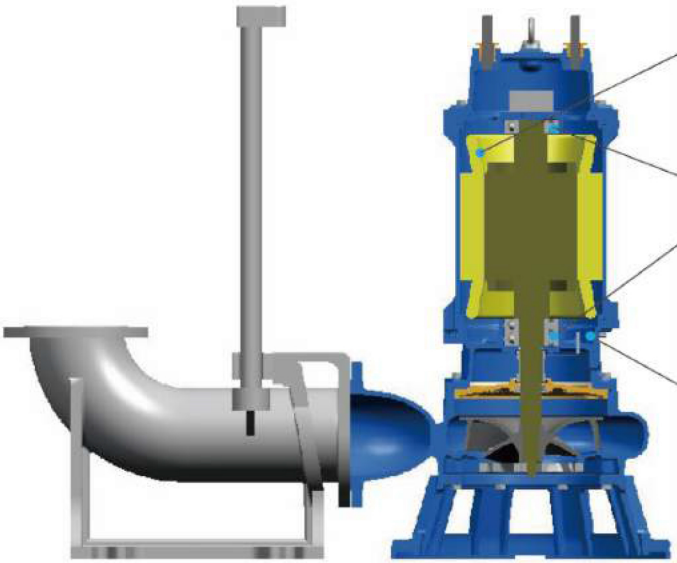
Normal sewage pump the power need very big when use the big flow point and motor will be heating and burn broken

OLBIN WC pump can use every point flowrate and power is almost one level.motor temperature is almost same level.

WC SERIES Cutting Pump **Non-clogging Sewage Submersible Pump**

Characteristic

1.Vortex semi-open impeller insure through big solid size
2.material for the cutter and cutter ring:
high-chromium stainless steel 420 and the hardness isHRC49-52 provide good wearing resistance.



Motor Thermal Sensor(MTS)

MTS is a bimetal type motor protector, which is embedded in each phase of stator winding. When overheat is detected, the sensor (in winding) will trip and the rely switch (in control box) will cut off the power supply of pump. (MTS is a regular component of pump, 15HP and above).

Bearing Temperature Sensor(BTS)

The BTS is a temperature sensor which is installed in the stationary of bearing. The BTS has to be connected to "indicator of temperature control" in control box. When the bearing temperature exceed the pre-setting temperature of "indicator of temperature control", the rely switch will cut off the power supply of pump. (BTS is an optional component of pump model).

Moisture Sensor (MS)

MS is an electrode sensor of water intrusion in all chamber. When water leakage is detected, the rely switch (in control box) will cut off the power supply of pump. (MS is a regular component of pump, 15HP and above). Thus, the damaged mechanical seal and lubricant can be replaced before water leakage occurs in motor housing. (MS is a regular component of pump, 15HP and above).

PRODUCT NOMENCLATURE

100	WC	60	24	11
Outlet Size(mm)	Pump Type	Rated Flow	Rated head	Power

APPLICATIONS:

- Drainage of wastewater in river ,waste water athreatment factory.
- Commercial building ,industrial area and amusement place drainage.
- School ,hospital ,government building and park drainage.
- Chicken farm,cow farm, pig farm ,fish farm ,slaughterhouse drainage.

SPECIFICATIONS

Item		Description
Limits of Use	Liquid Temp.	0~40°C (32~104°F)
	Applications	wastewater.sewage
Type	Frequency	50Hz
	Motor	4P(1450Rpm) • Dry motor
	Insulation	Class F
	Protection	IP68
	Protector	Thermal protect for motor ,bearing ,moisture sensor. (other protector in control box)
	Bearing	Ball type
	mechanical seal	Double M.seals
	Impeller	Vortex non-clogging cutter impeller
